

DATA SELECTIONS FRAMEWORK

SELF-SERVICE DATA

USE EXISTING BI TOOLS

Familiar Windows Explorer Style Data Field Selector

Source data in
business terms not
cryptic database
terms.

Next-Generation
Progressive Learning
Technology.

Instant Access to Your Data

Speed critical business decisions with accurate and immediate data without having to wait. Organize, rename and group data elements anyway you like.

Increase Profitability

Staff has a unique opportunity to find information on their own, providing measurable gains that will improve your business.

Features:

- No waiting for IT to build your reports
- Real-time data
- No learning curve
- Adaptable to future database changes
- No SQL Queries to write
- Server-side formulas
- Easy Windows style install
- Role based column and row security
- Supports Microsoft SQL, Oracle and ODBC

Compatible

Compliments all existing BI
Analytic and Reporting software
products. No need to replace or
learn new tools.
